

# ExitShield e-Cover

## ExitShield e-Cover®

- Designed for ease of installation, the ExitShield e-Cover® can be fitted and protecting devices within minutes
- Smart design and engineering result in an aesthetically pleasing but tough, protective cover
- An optional battery powered 90 dB alarm can be integrated with a 3 year battery life and incorporating a low battery warning LED
- A break seal can also be fitted to further increase deterrence against misuse
- A water resistant ExitShield e-Cover® is also available, providing protection for devices in hostile environments
- The ExitShield e-Cover® is available in 5 colours, red, green, yellow, blue and white

## GENERAL DESCRIPTION

The ExitShield e-Cover® is a tough polycarbonate hinged protective cover that can easily be installed over a range of emergency switches and other devices to provide protection from vandalism, accidental damage or misuse.

The ExitShield e-Cover® can also be fitted with an integral battery powered alarm, that when lifted emits an ear piercing 90 dB, warning the user that the device is for emergency use only and should not be tampered with.

In its red form it is commonly installed over fire alarm break glass call points to protect the break glass from deliberate misuse and this subsequently reduces the incidents of false fire alarms.

### Stop the costs of false fire alarms:

- while firemen are reacting to a false fire alarm they cannot attend another maybe more urgent case
- After a false fire alarm the building has to be evacuated causing inconvenience.
- Frequent false fire alarms reduces the probability that people leave the building quickly in case of a real fire

### Other applications for the ExitShield e-Cover® are:

- protection of call point against humidity (e.g. swimming pools, meat factories, industrial sites)
- protection of call point against accidental physical damage (e.g. sport gyms, industrial sites etc.)

Designed for ease of installation, the ExitShield e-Cover® can be fitted and protecting devices in minutes

Smart design and engineering resulting in an aesthetically pleasing but tough retrofittable protective cover

An optional battery powered 90 dB alarm can be fitted increasing the security and protection of the device it is covering

Fully rotational hinge provides increased protection against vandalism.
